FUNNY & OTHERWISE

A worn haggard, and half frozen, sniggered into the blizzard enveloped travel past many years ago and gasped, "Good. Give me food."

"My gosh, stranger," exclaimed the proprietor, "what happened to you out there in the wilderness?"

"My sled dogs kept dying along the trail until only the leader was left," said the man weakly. "Well, sir. That dog kept crying out hungrily, and I kept crying him."

"And?" prompted the proprietor eagerly.

"And," said the stranger grimly, "the dog's hair got grumpy."

"It is better to have loved and lost than to have to do the housework for three kids."

The shoulder strap, says a local wag, is the device that keeps an attraction from becoming a sensation.

Nowadays they call a man an extremist just because he is able to make both ends meet.

Last mail by train on Saturday

An era ends on Saturday of this week with the arrival of the Regina train from the west, which will carry the last mail to be traveled by that method. Commencing Monday, September 20th, all mail between Winnipeg and Regina through Roston, will be carried by truck.

When the service was cut off to the Winnipeg-Regina train through here, a mail truck took over one run per day, in the opposite direction to the train. While there is no further cut in train service, the Postal authorities have decided to route the mail by truck.

Commencing on Monday, the mail from the west will arrive daily at 4:35 p.m. and from the east at 10:45 p.m. Mail to be despatched will have to be in the post office one-half hour earlier than the arrival times. Mr. Oliver Chester, the local postmaster stated. — The Recorder, Roston, Man.—September 20, 1937.

Change to dial service on Sunday

At one minute after midnight Saturday, October 15, the three telephone exchanges at Calgary, Devon and Leduc were cut from manual operation to dial service. This hour was chosen for the cut so that there would be no actual disruption of service as possible. Existing area service will be in effect between the three centres; that is, calls between the three points will be on a local call basis. There will be no toll charges on these calls and residents in one centre will be able to dial phones in either of the other two centres without going through the long distance operation. When making a long distance call a subscriber will simply dial 0 and will reach one of the long distance operators in Edmonton. For information and price service subscribers are to dial 0 also.—The Representative, Leduc, Alta., October 17, 1937.

HERE'S HEALTH

WHY ARE SOME KIDS NEVER STRONG?

FORERUNNERS
The pipes used by the shepherds in the Holy Land are said to have been forerunners of the church pipe organ of today.

MARGARETS
The rulers of Frisia, who later became emperors (kaiser) of Germany, were originally known as the margarets of Brandenburg.

FURNISHED POWER
Volcanic steam, harnessed to plants at Lardham, Italy, furnishes nearly one-fourth of the nation's total electric power.

LARGEST EAGLE
The eagle hawk is the world's largest eagle. Its nest may be eight feet in diameter and nearly as deep.

Good weather aids in completion of harvesting

Warm, dry days have provided good harvesting weather in much of southern Saskatchewan and good progress has been made with the current crop report just issued by the statistics division of the Saskatchewan department of agriculture.

Very little of the wheat and barley remains standing and a slight decline in the fall crop.

While sowing and discoloration will affect the quality of wheat at some points, generally about 85 percent of the crop will grade No. 4 or better with the highest percentage being in the No. 2 and No. 3 grades.

Frost has not been a significant factor this season as crops were sufficiently advanced to escape any serious losses from this source.

Over the entire province the harvesting of the 1937 crops should be completed this week. — The Western Canadian, Sask., October 16, 1937.

3000th Oil well for Saskatchewan in Carnduff area

Saskatchewan's 3000th oil well was completed recently in the Carnduff field of southeastern Saskatchewan.

The 3000th well was completed on November 12, 1934, at Lloydminster. The 1000th well was completed almost 10 years later on October 8, 1934, in the Lone Rock field. Two years later Saskatchewan's 2000th well was completed in the Steadman field. The Canadian Post-News, Carnduff, Sask., October 21, 1937.

Canadian Girls Fly Between Two Worlds West Coasters Like Orient

Canadian Airline Hostess Colleen Watt of Rimbey, Alberta, (left) and Joanne Simmonds of Vancouver, B.C., (right) ply the skies regularly between Canada's West Coast and the Far East. Flying the Vancouver-Tokyo

run, the girls have come to feel equally at home in both worlds and enjoy exploring the unique beauties of each. Above, the famous Buddha at Kamakura is photographed for their album.

When in the East Colleen Watt believes in doing as the Orientals do. She uses chopsticks to sample the Sukiyaki dinner which the Japanese maid has prepared over a charcoal burner.

Japanese diners are among the finest in the world and Miss Watt travels Japan seeking out the most beautiful ones. Pigeons, she says are the same everywhere eternally curious, perpetually hungry.

Colleen and Joanne don their Airline uniforms for the return flight to Vancouver — a 22-hour hop via Alaska. Both girls say they love the life and their forthrightly spin between two worlds.

Colleen Watt is a great admirer of the easy, graceful lines of the Japanese national costume. The gown she is trying on retails in Tokyo for about \$10.

local prosperity in winter no less than in spring, summer and autumn. Without it, consumer demand for goods and services cannot be sustained and business will become depressed. Everyone has a vested interest in seeing that this is not allowed to happen.

Every one of us has an obligation to help hold down seasonal unemployment in our community.

Local & District

C. O. Stubbs and two sons, of Corvaton, were Armistice Day visitors in Della.

James Martin is a patient in the Calgary General Hospital.

Mrs. E. Friedley was a visitor to Calgary last week.

Mike Gaetz spent the week visiting his parents, Mr. and Mrs. Gaetz.

Robert Thompson spent the week end at the home of Mr. and Mrs. L. B. Thompson.

Mr. and Mrs. N. McLeod moved to Saskatchewan last week to attend a wedding.

Mrs. Mitchell and family

Mr. and Mrs. Alex Morrison and family, of Halkirk, were visiting with relatives in Della over the holiday.

Duren McLeod spent the week end at the home of her parents, Mr. and Mrs. Neil McLeod.

Sharon Peters spent the week end at the home of her parents, Mr. and Mrs. S. Peters.

Mr. and Mrs. G. Thompson spent a few days at the home of Mr. and Mrs. Lester Battle last week.

Ronald Eberle spent the week end at the home of his parents, Mr. and Mrs. Jacob Eberle.

Elene Vanpiper spent the long week end at the home of her parents, Mr. and Mrs. K. Vanpiper.

Russell Bradford and son Bobby, spent the week end and visiting friends in the Della district.

Darlene Williams spent the week end at the home of her parents, Mr. and Mrs. Marc Williams.

Mr. and Mrs. Pat Collins and baby daughter spent the week end at the home of Mr. and Mrs. Wm. Holmes.

A very good turn out was reported at the Ladies' Auxiliary's first monthly card party last Thursday night.

Mr. and Mrs. W. Robinson, of Halkirk, spent Sunday with the former's sister and brother-in-law, Mr. and Mrs. B. Marshall.

Remember the Fall Chicken Supper, to be held at the Della United Church Annex on Saturday next, November 16th. Your patronage will support the church.

The weather has been generally mild and dry during the past week. At present writing it has become colder and somewhat foggy. The temperature is 35 above.

An Orientation Course in Civil Defence will be held in Halkirk on Saturday, 18 to 22nd Evening classes. Anyone interested in attending these classes should contact Mr. Clarke, Mr. of the Treasury Branch, Hanna.

Living With Hoary Cress
Lathbridge Experimental Station
Wesley, Alberta
J. J. Samuels, agriculturist.

Work conducted at the Dairy Station and elsewhere in the area Alberta during the past twelve years has given fairly conclusive evidence that it is possible to farm along with instead of against, hoary cress. It should not be inferred that such a state of affairs is easily achieved, but rather that the weed can be held in check on part of the farm while being eradicated from selected portions.

A Commentary

Although the loss of agricultural land to urban and industrial development has been considerable in some parts of Canada in recent years, it is probably small by comparison to the losses that have been suffered, for instance, in the British Isles. Here, during the past fifty years, the actual agricultural area of England and Wales has declined by about 2,200,000 acres or approximately one-seventh of that now currently being needed to wheat.

It is estimated that, during the next twenty years, an additional 600,000 acres will be needed for all forms of industrial development and that the new

average annual loss of agricultural land in the United Kingdom is about 10,000 acres.

It is estimated that, during the next twenty years, an additional 600,000 acres will be needed for all forms of industrial development and that the new

average will be taken largely at the expense of better than average land. New alfalfa may also require about 3,000, 000 acres by the end of the century, but this will be taken largely from the poorest types of agricultural land.

During 1957 roughly one-quarter of the total cultivated areas in England and Wales was needed to the three major grains, wheat, oats and barley (Wheat, 2.0 million acres; Barley, 2.4 million acres; Oats, 1.3 million acres) and approximately half was in permanent grasses. Considered probable is a further increase in the production of home-grown feeding stuffs, with special emphasis on the increase use of grassland.

A CNR engineer must know more than 300 operating rules,

PROVINCIAL DEPARTMENT OF HEALTH IN ACTION

The health of Alberta is the primary consideration of this department involving many branches of government and the highest standard of health is the object of Alberta's health service.

COMMUNICABLE DISEASES

The purpose of this division is to record the incidence of communicable diseases based on local health reports and to provide advice on preventive and control methods.

FREE VACCINES AND SERUM

The Provincial department of public health supplies free of charge and serum used for immunization and treatment purposes.

MUNICIPAL NURSES

The Public Health Nursing Division has a staff of 10 registered nurses whose primary duty is to provide a measure of public health service to the community.

HEALTH TALKS AND LECTURES

The division carries health education through the people through films, radio broadcasts, television, and other media.

HEALTH SERVICES

There are 20 health units operating throughout the province each consisting of a medical officer, a public health nurse, a sanitary inspector, and a sanitary technician.

HEALTH EDUCATION

Good health doesn't just happen! It requires the active and well informed cooperation of the community. The Department of Health through HEALTH EDUCATION SERVICE provides the people of Alberta with information and the information to build in the younger generation attitudes and habits that lead to health.

HEALTH TALKS AND LECTURES
